## LOST ISLAND IS DE GREAVES'

CRUISER TACOMA PROBABLY LOOKING FOR ISLAND ON THE TAHITI-SAN FRANCISCO ROUTE.

Associated Press, Morning Service. TACOMA, April 25.—Orders have been received from the Navy Department by the cruiser Tacoma to cruise from Tacoma to Honolulu and between Honolulu and San Francisco in search of the lost island, which has been often reported by sea captains, but the existence of which is doubted.

No lost island between Honolulu and San Francisco is known of and it is thought that the above dispatch relates to De Greaves' island, between San Francisco and Tahiti instead of Honolulu. De Greaves' island was sighted many years ago by John De Greaves, who was in charge of the Honolulu morgue until recently. He took its position and is said to have been the only man to do so.

The island is a low one, only visible when from a short distance, but is believed to be valuable in guano deposits. De Greaves intended to claim it and asked Captain Lawless of the steamer Australia then on the Tahiti run to look out for it, and on one of his trips about a year ago Lawless sighted it. The fact that the island has been so seldom seen by passing vessels has led to suspicions that it is subject to volcanic changes and rises and sinks. Now that the navy department has undertaken to locate it, it will probably be definitely charted and its character and value ascertained.

## THE ADVANTAGES CEMENT ROOFING!

POSSESSES OVER

Tin, Iron and Steel Roofing

IT CANNOT RUST.

Gases, fumes, moisture, coal soot and smoke cannot injure or effect cement roofing.

It is better adapted for application over uneven surfaces, such as old shingles or metal roofs, obviating the expense of removing the same. It will not rattle from wind and storm, nor create any noise from rain falling upon it. The materials used in cement roofing are the best non-conductors of heat and cold known, therefore it will keep the building warmer in winter and cooler in summer than a metal roof.

Samples and full particulars mailed on request.
